Subject: Testing for Possum Point Dredge

Hi

You will be receiving a requisition for \$490 K to approve for testing prior to commencing the dredging. This can be done immediately. The purpose of this testing is to determine how impounded fly ash in Pond Echo reacts to dewatering and how the dewatering affects fly ash pore pressure, stability and ability to be excavated.

This is a sole source award. Due to the schedule requirements for the dredging, this needs to be done to ensure a successful dredge of the materials. The firm that will do the testing was recommended by the dredging company (Glover).

Please let me know if you have any questions. I can be reached at (757) 449-3641. Thanks.

Christine
